L. Boyd, more familiarly known among his friends as "Lin," arrived Wednesday evening from Yavapai county, after an absence from Bisbee of ten years. Mr. Boyd is an old employee of the Copper Queen. These old Copper Queen miners will drift back to Bisbee, and in all their travels they don't find a better camp in the west. Mr. Boyd has spent a great part of his life in prospecting and tells an interesting story on a mining superintendent up in Montana. Mr. Boyd got into town late one evening with his pack animal and was told to go up the side of the mountain and wait alongside the trail until the superintendent came along, and he would probably get a job. "Lin" took up his station as directed, together with his pack horse. In a few minutes the superintendent came in sight and Boyd halted him. He carefully scrutinized the outfit and, in answer to an application for work, said: "If I was to give you a job you wouldn't stay two months before you would be off prospecting again." "Yes," answered Lin, "and if it wasn't for us prospectors you wouldn't have your present job." This truth seemed to strike the superintendent as the best thing he had heard in a long time. Lin got the job, remained four months and was off on another prospecting trip.

He was for several years employed in the Bank of Tombstone during the palmy days of that city's prosperity and it was during that time that he received the training and experience that so well fitted him for the duties of the position of trust and responsibility which he now holds.

James Nevells was killed last Saturday by an old adobe wall falling upon him at Rock Creek canyon about six miles from the McKittrick ranch in the Sulphur Spring valley. He was employed at the McKittrick ranch doing some repairing, and started out about 8 o'clock a. m. on that day to get some adobes from an old adobe wall at the mouth of Rock Creek canyon. The next morning his team had returned to the ranch and Mrs. Parks took up the search, following the wagon tracks to Rock Creek canyon, where she discovered his remains under the adobe wall. In place of picking the adobes off the top of the wall he had been digging them out at the bottom, thereby weakening the foundation of it, causing it to fall, and he was caught and crushed to death.

A fatal accident happened to a Mexican laborer on the Morenci Southern one day last week, says the Clifton Era. Drill holes had been made for blasting out the rock in an open cut, and the Mexican was engaged in pouring powder into the holes. One of the holes choked up, when the Mexican, instead of using a stick which was provided for that purpose, picked up a drill and commenced pounding in the hole. The result was an explosion, which threw rock over forty or fifty men at work in the cut below, two of whom were slightly injured. The Mexican, who was responsible for the accident was so badly hurt that he died en route to the hospital at Morenci. The wonder was that more people were not hurt by the explosion.
